SUMMARY

I am a data analyst and web developer living in Liverpool. For the last eight years, I have been working as an analyst for a company that monitors and analyses data from different media resources. In 2011 I started medan.sk site where my colleagues and I promote our work and write short analyses about the latest topics. This WordPress project has kindled my passion to become a web developer and I have since learned and used HTML5, CSS, jQuery and Angular JS to build web applications. Recently I've started with PHP and Python where I see a great opportunity for me to build applications that connect my two main interests – data and web developing. I am interested a job where I can share my skills, bring and learn something new and be part of a great team.

KEY SKILLS AND TOOLS

HTML5	(advanced)
CSS3	(advanced)
jQuery	(intermediate)
Angular JS	(intermediate)
PHP	(basic)
Python	(intermediate)
WordPress	(intermediate)

WORK EXPERIENCE

Freelance Web developer

July 2015 – present

I build web applications mostly on WordPress platform. I am also using technologies like jQuery, Angular JS and bit of PHP to create [static sites](#).

Data Analyst - Newton Media

February 2009 – present

I produce analyses in a form of coverage reports (positive or negative articles, main topics, top media etc.) and quantitative inputs for marketers (advertising value equivalent, most influential authors etc.). In 2011 I created medan.sk site where my colleagues and I promote our work and write short analyses about the latest topics. I also wrote several analytical programs in Python that help with data processing.

Care and support worker - L'Arche Liverpool

March 2013 – present

I support people with learning disabilities. I assist them in the development of their independent living skills.
