BIO

My name is **Radoslav Tomas** and I'm a web designer and developer. Originally from Slovakia, I currently live in Liverpool, UK. For almost eight years I have been working with data as an analyst for a company that monitors and analyses data from different media resources.

In 2011 I created medan.sk site where my colleagues and I promote our work and write short analyses about the latest topics. Currently, the site has more than 900 likes on Facebook (which is quite good for Slovak environment and can be compared with the most NGO's there) and serves as an inspiration for many Slovak journalists in their work.

This project has kindled my passion to become a web developer and one year ago I've started to build my first sites.

Since then I haven't stop coding…

WORK EXPERIENCE

Data Analyst   - Newton Media   *February 2009 – present*

I monitor and analyse data from different media sources (including social media) for a range of companies (banks, carmakers, pharmaceutical companies, council departments etc.). My work is to search for the data, collect, clean and filter it out. I produce media coverage reports (positive or negative articles, main topics, top media etc.) or inputs for marketers (advertising value equivalent, most influential authors etc.). In 2011 I created medan.sk site where my colleagues and I promote our work and write short analyses about the latest topics. Currently, the site has more than 900 likes on Facebook.

Care and support worker   - L'Arche Liverpool   March 2013 – present

I support people with learning disabilities in order to assist them in the development of their independent living skills. This work has helped me to become fluent in English.

Editor   - Jaga Group Publishing House   April 2008 – February 2009

Writing and editing on-line contents for company's site.
